

DESCRIPTION OF FOUNDER

Dr. J. Theodore Brown Jr is the founder and CEO of Telecare LLC a hybrid based health technology platform that facilitates access to health care and promotes the home as an option to receive certain health care services. He is originally from New York City and strongly believes that technology can enhance and make health care more accessible and affordable on a global basis.

Before Telecare LLC, Dr. Brown worked in developing and organizing technology solutions and programs for some of the most challenging mental health and substance abuse problems, as well as creating and integrating health protocols and models of home health care for the elderly and chronically ill.

Dr. Brown has a broad range of clinical experience that includes clinical program development, management, forensic consultation, research and education. He served in the US Navy Medical Service Corp. and is a Plank Member of NRMC, Okinawa, Japan. He has served as expert witness for the U.S. Congress and represented the U.S. Clinically and Diplomatically abroad for the U.S. Department of State.

He created and received approval for the first and only FDA approved Home Drug Testing System sold over the counter. He holds a Ph.D. in Experimental Clinical Psychology from S.U.N.Y Stony Brook and currently lives in New Jersey with his wife of twenty years.

**A DIGITAL
HEALTHCARE
COMPANY**

SUBSTANCE ABUSE PROGRAM

Substance abuse is a pervasive problem affecting all segments of society. There are not enough substance abuse specialists or facilities to effectively address the problem. Also, many persons who are addicted avoid treatment for fear of losing their jobs and to avoid the stigma associated with being known to have a drug abuse problem. This is especially true for VIP and persons living in small towns and rural areas. Telecare LLC offers substance abuse and Health Providers the option and availability to provide, and Patient/Clients to receive, substance abuse services in the privacy of their home from any device that allows them access to the Internet.

Telecare LLC

1501 Oakland Avenue, Suite D
Millville, New Jersey 08332-0009

CONCEPT

Telecare LLC was originally conceived with the purpose of creating a new standard of care to serve the healthcare needs of disabled Veterans. As an afterthought, we realized that if the “standard of care” we established was extended to other special needs groups, it would help improve the quality of health care for society at large

TELECARE PRIMARY OBJECTIVES

Telecare’s primary objective is to create an integrated, virtual, technology enhanced model of health care that facilitates communication between health care Providers and their Recipients.

Telecare LLC believes that **home care** is the future of health care. We believe this is especially true for:

- Disabled Veterans
- Persons Affected by Mental Illness
- Persons Affected by Substance Abuse
- The Elderly, Disabled
- Persons with Chronic Illness
- Children with Special Needs
- Persons restricted from receiving proper health care due to weather, limited transportation and those living in remote/rural areas.

TELECARE LLC SUBSTANCE ABUSE SERVICES

Telecare LLC uses technology and innovative products to provide a unique array of home programs such as:

- Electronic Health Record Intake
- Risk Assessment & Evaluation
- Anonymous Drug Testing
- Medication Prescription Monitoring
- Audio/Visual Conferencing
- Specialty Consultation and Referral
- Education and Training
- Emergency Consultation

TELECARE BENEFITS FOR PATIENTS

Receiving Health Care at Home
